

Don't just purge... *Ultra Purge!*[™]

Medical

High temperature engineering polymers

PSU, PEEK, PC, PVC, HDPE and PS have very different chemical and mechanical properties. Ultra Purge has a wide product selection that targets specific resins and applications to boost productivity and the quality of your products.

Transparent resins

The medical industry has high quality requirements that make necessary the use of Ultra Purge. Our FDA approved chemical technology is safe and efficient when purging injection molding machines, hot runners and blow molding machines that make medical parts. You can achieve fast start ups, remove carbon deposits and obtain fast color changes with Ultra Purge.

Blow molding

Color changes as well as black specks are common problems with blow molding applications. Specifically designed grades of Ultra Purge assist with reducing downtime and scrap on blow molding machines resulting in increased production. We will also make sure that Ultra Purge meets the certification levels required for your products.

Hot runners

Ultra Purge is effective at purging engineered resins from high cavitation tools that are hot tip or valve gated.
