Packaging

Caps & Closures

Ultra Purge P-O

Color changes on high cavitation tools often generate an excessive amount of scrap and downtime. The chemical technology in the FDA approved Ultra Purge P-O grade will allow injection molders to safely clean their machines while molding parts.

Ultra Purge BP

Ultra Purge BP is a concentrated grade designed to safely purge hi-flow PP or PE from hot runner systems in stack tool applications.

Blow molding

Ultra Purge 9015

Color changes and black specks are a typical problem with blow molding applications. The Ultra Purge 9015 is specifically designed to reduce downtime and scrap when purging blow molding machines.

PET preforms

Ultra Purge PET-E

Ultra Purge PET-E is designed to safely purge the injection unit and the hot runners in injection molding machines making PET preforms. The option to purge the hot runners with the mold open or closed makes the Ultra Purge PET-E a flexible solution to clean your machine.

Film extrusion

Ultra Purge PO-C

Ultra Purge PO-C is a chemical concentrated grade, is engineered to purge extrusion blown film machines. The bubble will remain intact when purging multi layer film lines with the PO-C. Ultra Purge behaves similarly to the production material.
